HOW DO I BECOME A QAP?

1. REQUIREMENTS

To process cannabis into extracts, edibles or for final packaging, Health Canada requires a QAP to be listed on your licence prior to submitting the application.

2. QUALIFICATIONS

Health Canada considers several factors when assessing a QAP application. This includes reviewing your **educational background**, **technical knowledge** related to the Cannabis Regulations, as well as professional experience working in QA.

3. CERTIFICATIONS

AAPS offer a **4-day QA for Cannabis training** that is recommended by Health Canada. This training supports your QAP application and helps you meet the training and education required to perform your duties effectively.
